**TBR Black Series**

Two Brothers Racing carbon fiber slip-on

**Michelin Power**

**6**

Current-generation sport tires with plenty of tread

**Clean title**

Paid off, no lien, garage kept, tags through March 2027

## What the R1M comes with from the factory

The R1M is the limited, reservation-only version of the R1. Everything below is standard equipment on this bike.

### Engine & drivetrain

- 998 cc crossplane-crank (CP4) inline-four, liquid-cooled, DOHC 16-valve
- Titanium fracture-split connecting rods (first on any production motorcycle)
- Roughly 200 hp at the crank with ram air, 14,000 rpm redline
- Six-speed gearbox with assist-and-slipper clutch
- Factory quick shifter for clutchless upshifts
- 4.5 gal fuel tank

### Electronics

- Six-axis Inertial Measurement Unit feeding every rider aid
- Lean-sensitive traction control, slide control, wheelie (lift) control, launch control
- Four rider-programmable ride modes and four power maps
- Lean-sensitive ABS with Unified Brake System
- Full-color TFT dash with Street and Track layouts and lap timer
- LED headlights, position lights and tail light

### R1M-only equipment

- Öhlins Electronic Racing Suspension: 43 mm fork and TTX36 shock with a Suspension Control Unit, three automatic and three manual modes, set from the dash
- Communication Control Unit with built-in GPS data logger; Wi-Fi to the Y-TRAC app for lap analysis and setting changes
- Carbon fiber front fairing, side fairings, front fender and tail section
- Brushed aluminum fuel tank cover and polished aluminum swingarm
- Wider 200/55 ZR17 rear tire on a 6.0 in rim (standard R1 runs a 190)
- Silver Blu Carbon livery, sold by online reservation only

### Chassis & brakes

- Aluminum Deltabox frame with magnesium rear subframe
- Cast magnesium 10-spoke wheels
- Dual 320 mm front discs with four-piston monoblock calipers, 220 mm rear
- Wet weight about 443 lb; seat height about 33.9 in; wheelbase 55.3 in

## Upgrades & modifications

Items tagged **IN PHOTOS** are visible in the photo set below.

### Two Brothers Racing Black Series carbon slip-on

[IN PHOTOS](#)

Carbon fiber canister with machined black end cap and stainless strap. Lighter than the stock can with a much better sound. Stock exhaust included: **TBD**

### Yoshimura fender eliminator [IN PHOTOS](#)

Stock rear fender and plate hanger deleted for a tucked, clean tail. Yoshimura license plate frame to match. Stock fender included: **TBD**

### Compact LED rear turn signals

[IN PHOTOS](#)

Low-profile LED signals fitted with the tail tidy. Brand: **TBD**

### Michelin Power 6 tires [IN PHOTOS](#)

Michelin's current sport tire. Rear confirmed in photos; front **confirm**. Installed **date / mileage TBD**.

### Swingarm spools [IN PHOTOS](#)

Blue anodized aluminum spools. Rear-stand ready for chain and tire work.

### Battery tender quick-connect [IN PHOTOS](#)

SAE pigtail wired to the battery. The bike has lived on a tender, which is why a low-mile bike starts on the button.

### Recent parts & consumables

Battery **brand / date TBD**

Magnetic oil drain plug **brand TBD**

Oil filter & oil **last change TBD**

Other **levers / sliders / flash — TBD**

## Condition & ownership

### Paperwork
