6**

New set front and rear,
August 2025, under
100 miles on them

**Clean title in
hand**

Paid off, no lien,
garage kept, tags
through March 2027

What the R1M comes with from the factory

The R1M is the limited, reservation-only version of the R1. Everything below is standard equipment on this bike.

Engine & drivetrain

- 998 cc crossplane-crank (CP4) inline-four, liquid-cooled, DOHC 16-valve
- Titanium fracture-split connecting rods (first on any production motorcycle)
- Roughly 200 hp at the crank with ram air, 14,000 rpm redline
- Six-speed gearbox with assist-and-slipper clutch
- Factory quickshifter (QS) for clutchless upshifts
- 4.5 gal fuel tank

Electronics

- Six-axis Inertial Measurement Unit feeding every rider aid
- Lean-sensitive traction, slide, wheelie and launch control (TCS, SCS, LIF, LCS)
- Four rider-programmable ride modes and four power maps
- ABS with Unified Brake System (UBS)
- Full-color TFT dash with Street and Track layouts and lap timer
- LED headlights, position lights and tail light

R1M-only equipment

- Öhlins Electronic Racing Suspension (ERS): semi-active 43 mm fork and TTX36 shock, three automatic and three manual modes, set from the dash
- Communication Control Unit (CCU): built-in GPS datalogger, Wi-Fi to the Y-TRAC app for lap analysis and setting changes
- Carbon fiber front fairing, side fairings, front fender and tail section
- Brushed aluminum fuel tank cover and polished aluminum swingarm
- Wider 200/55 ZR17 rear tire on a 6.0 in rim (standard R1 runs a 190)
- Silver Blu Carbon livery, sold by online reservation only

Chassis & brakes

- Aluminum Deltabox frame with magnesium rear subframe
- Cast magnesium 10-spoke wheels
- Dual 320 mm front discs with four-piston monoblock calipers, 220 mm rear
- Wet weight about 443 lb; seat height about 33.9 in; wheelbase 55.3 in

Upgrades & modifications

All bolt-on, and all of it stays on the bike. Items tagged **IN PHOTOS** are visible in the photo set below.

Two Brothers Racing Black Series carbon slip-on

IN PHOTOS

Carbon fiber can with machined black end cap and stainless strap. Lighter than the stock can and sounds the way a crossplane should.

Yoshimura fender eliminator IN PHOTOS

Tail tidy: stock rear fender and plate hanger gone for a tucked, clean tail. Yoshimura plate frame to match.

Custom LED Blaster-X integrated tail light

Smoked-lens drop-in replacement for the stock tail light. Far brighter than OEM, with programmable brake-alert flash.

LED turn signals

Compact LED signals mounted on the tail tidy. No bulky stock stalks.

Michelin Power 6 tires

Michelin's street sport tire. New set, front and rear, bought together from Performance Cycle in August 2025. Under 100 miles on them. The July 2024 photos still show the old Dunlops.

Swingarm spools

Blue anodized spools. Rear-stand ready for chain and tire work.

Battery tender quick-connect

SAE pigtail wired to the battery. The bike has lived on a tender, which is why a low-mile bike fires on the button.

Recent service items

Battery	Shorai LFX14L2 lithium iron, new December 2021. Kept on a tender
Magnetic oil drain plug	Votex stainless, neodymium magnet
Oil & filter	Early 2026, Yamalube Hi-Performance full synthetic 10W-40, changed yearly. Ridden twice since

Condition & ownership

Paperwork

Title	Clean Colorado title in hand, paid off, no lien
Registration	Current, tags through March 2027
Insurance	Insured (GEICO)
Keys	One (all the owner was given)

Care

Storage	Garage kept, on a battery tender
Service	Performance Cycle (Denver area)
Last oil change	Early 2026, Yamalube full synthetic 10W-40
Drops or tip-overs	Never
Known issues	Just one. The battery goes flat if the bike sits unplugged for a stretch, so it lives on the lithium charger, which comes with the bike

What comes with it

- Everything on the bike stays on the bike: exhaust, tail tidy, tail light, signals, spools, tender lead
- Passenger seat (the factory seat cowl with the CCU stays on the bike)
- Front and rear paddock stands (lifts for chain, tire and oil work)
- BikeMaster lithium battery charger (the bike lives on it)
- Clean title in hand, ready to sign over
